

BLRT REPAIR YARDS

Every detail matters!

Intro

As a group of yards with locations in Lithuania, Estonia and Finland, we are incorporated by **BLRT Grupp** – one of the largest industrial holdings in the region of the Baltic Sea. By becoming Your trusted partner in the design, technical support, repair, maintenance and retrofit of Your fleet, You can be sure that we will:

Support Your goals and targets

Ensure the seaworthiness and performance of Your fleet

Ensure efficient and cost-effective ship repair projects

Yards in brief

3 countries

7 docks

~ 1100 employees

- Production workshop areas – **21 000 m2**
- Floating cranes – **2 * 100 t** lifting capacity
- Mobile cranes – **104 t** and **850 t** lifting capacity
- Pier cranes – **7 * 10t , 2 * 20t , 12 * 30t , 1 * 32t , 1 * 50t , 1 * 100t , 1 * 150t**
- KAMAG lifting platforms – **2 * 250 t | 500 t** lifting capacity
- Over **3500 m** of berths

The largest floating dock in the Baltics

	Dock 219	Dock 170	Dock 12
Lifting capacity	27 000 t	30 000 t	33 000 t
Keel blocks length	200 m	201,4 m	235 m
Width between fenders	30 m	34 m	44 m
Cranes	2 x 15 t	2 x 15 t	2 x 12 t

Western Shiprepair

An aerial photograph of a large shipyard facility. In the foreground, a large red and white ship is docked at a long pier. Behind it, several other large blue and white floating docks are visible, some with yellow cranes. The water is dark green, and the sky is clear. The overall scene depicts a busy industrial environment for ship repair and construction.

One of the largest dry docks in Northern Europe

Graving Dock	265 m x 70 m x 7.1 m
Quays	123 m / 184.5 m
Crane capacity	150 t, 100 t, 30 t
Electrical power supply	up to 2800 A, 2 MW

Turku Repair Yard

	Dock 2	Dock 34	Dock 22
Lifting capacity	4 500 t	8 500 t	10 000 t
Supported length	101 m	139.5 m	165 m
Clear breadth	22 m	23.8 m	30 m
Cranes	5 t	5 t + 5 t	2 x 10 t

Tallinn Shipyard

General ship repair and Complex solutions

Innovative designers and engineers → [link](#)

Newbuild vessel design. 3D scanning. Project development.

Retrofit and conversion.

Piping division → [link](#)

11090 m2 production area with a large number of specialized machine tools for manufacturing of pipelines, profile structures and metal processing

Painting division → [link](#)

Anticorrosive protection for marine and industrial projects using **robotized**, more **sustainable** and **environmentally friendly** technologies

Hull division

Maintenance, repair, and construction of the ship's hull and related structures: hull Inspections and reporting on the condition of the hull, hull repairs, structural modifications

Electrical solutions → [link](#)

Repair and overhaul of electrical machines. Electrical engineering, installation and commissioning. Shore power connection

Marine safety service division → [link](#)

A full scope and quality maintenance of **rescue equipment** and appliances

Mechanical division. Propulsion → [link](#)

Maintenance and repair of deck and engine room machinery, propulsion complex service

Machine building → [link](#)

8000 m2 area of series production and machining of metal products and structures for industrial use

Shipbuilding → [link](#) [link](#)

Modern shipbuilding yard with a **50000 m2** covered workshop area offers full range of services from conceptual design to turn-key solutions.

Large scale and complex steel structures → [link](#)

45550 m2 area for production of complex steel structures for Offshore Oil & Gas, Renewables, Infrastructure and Industrial projects

Green solutions for the shipowners → [READ MORE](#)

Exhaust gas cleaning systems

Shore power connection

Ballast water treatment systems

Decarbonization solutions

Hybrid solutions

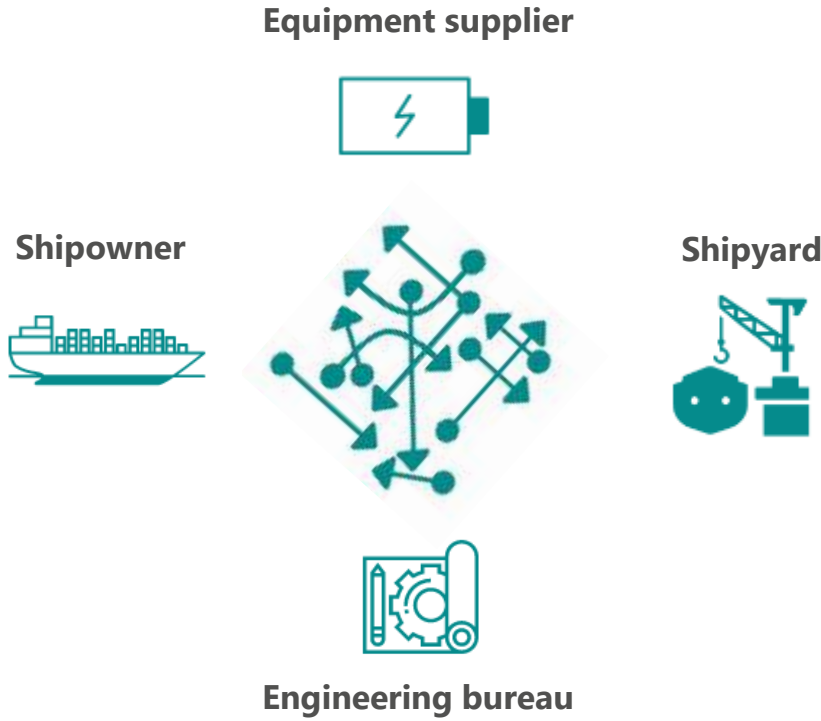

Wind propulsion system

Transition to alternative fuels

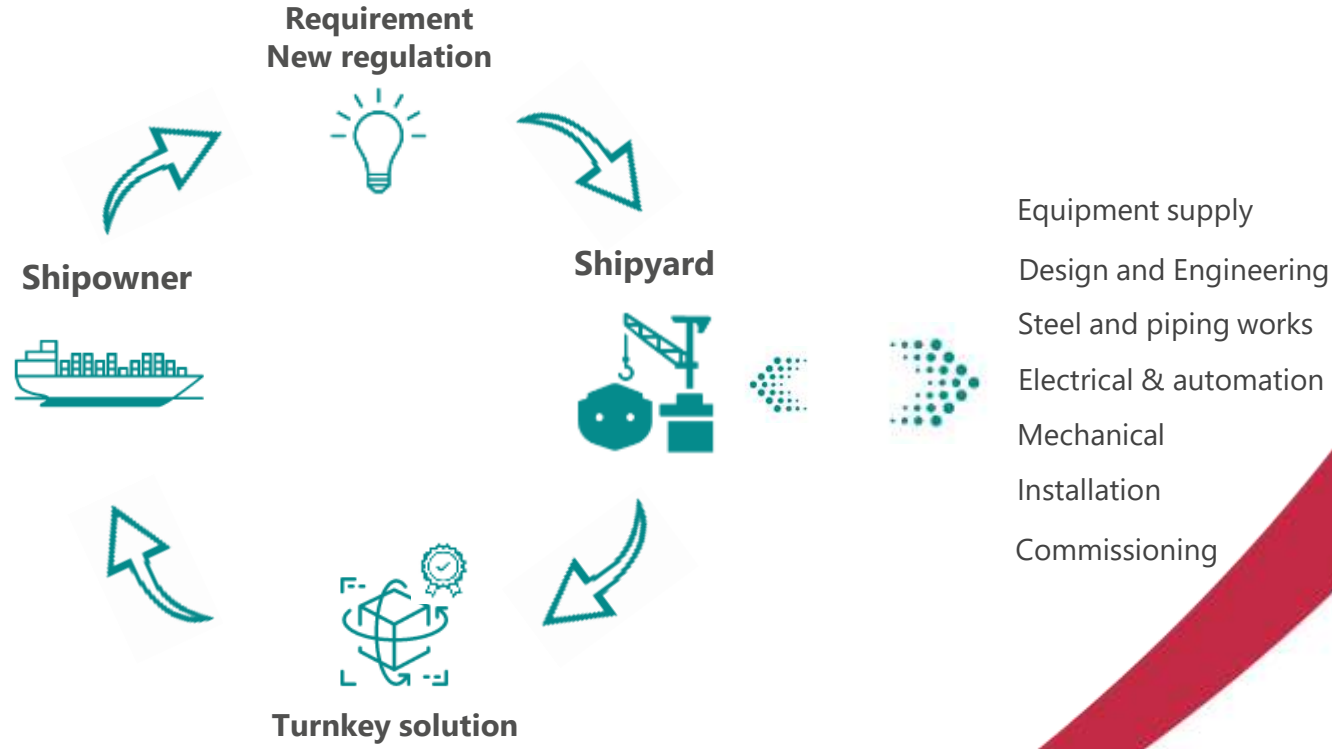

How it usually works...
